PLATFORM · FIRST PROTOTYPE (D3.1)

Connecting surplus food with the people who can use it

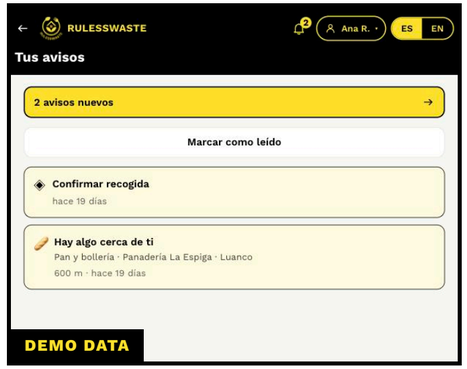

A web tool that works on mobile and is designed for rural areas: few steps and plain language.

HOW IT WORKS

1 Publish

A shop, bar or producer posts a surplus: what it is, how many kilograms and until when.

2 Alert

People and organisations nearby receive a proximity alert.

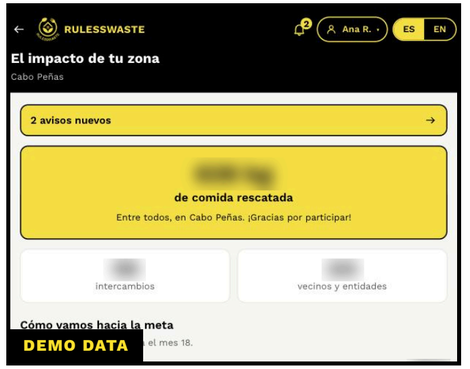

3 Claim

Whoever needs it claims it and both parties coordinate by messaging.

4 Confirm

At handover, both parties confirm the delivery and the real kilograms.

5 Record

Kilograms are logged by zone and municipality and can be exported for the evaluation.

DIGNITY DONATION

The recipient is never shown publicly. A social organisation mediates and the handover is discreet.

Designed for small communities, where discretion decides whether people take part.

SIX MODULES

1. Surplus and alerts
2. Donation and redistribution
3. Indicators by zone
4. Community forum
5. Feedback and surveys
6. Administration and data export

WHO TAKES PART

- Residents
- Shops, hospitality and producers
- Social organisations
- Local authorities
- Project team

Status: first prototype, functionally validated. On-site validation open. Test data are demonstration data. **rulesswaste.com**
